Khadeejah Yasin

khadeejah1065@gmail.com | LinkedIn:www.linkedin.com/in/khadeejah-/ | GitHub: https://github.com/khadeejah-01

Summary: Passionate Computer Science student focused on building research-driven, secure and efficient software solutions. Proven ability to create advanced IoT systems and accurate machine learning models while following strong security practices.

EXPERIENCE

CodeAlpha

C++ Programming Intern *01/03/2025 – 30/03/2025*

- Using C++ and OOP, honed my problem-solving skills, coding abilities and gained valuable insights into real-world programming applications.

EDUCATION

Army Burn Hall College, Affiliated with University of Peshawar

B.S. in Computer Science *11/2023 - Current*

- **GPA:** 4.0/4.00
- **Related Coursework:** Data Structures & Algorithms, Computer Organization & Architecture, Artificial Intelligence, Intro to Neural Networks, Applied Image Processing, Probability & Statistics, Linear Algebra, Multivariate Calculus

PROJECTS

Cloud Cost Predictions and Monitoring Dashboard

- Built a cloud cost monitoring system in **Java** for tracking and analyzing resource utilization
- Integrated a **Flask**-based ML model to forecast cloud costs using historical usage data
- Processed **1.18M+** records to enhance prediction performance and analytical insights
- Link https://github.com/khadeejah-01/Cloud-Cost-Prediction-Monitoring-Dashboard

LoanWise: Data-Driven Lending Decision System (Python, Scikit-learn):

- Built an end-to-end supervised **ML pipeline** using KNN, Logistic Regression, and Naïve Bayes models for loan approval prediction, with EDA, feature engineering, encoding, and model evaluation (Precision, Recall, F1).
- Naïve Bayes achieved the highest precision (**81%**), while Logistic Regression showed improved precision-recall balance after feature engineering; KNN performed poorly due to high-dimensional encoded features. Github link

Sentiment Analysis Model

- Achieved **89.22%** accuracy in binary text classification using Logistic Regression on the IMDB 50k dataset.
- Optimized model performance via **TF-IDF Vectorization** and rigorous preprocessing (HTML removal, NLTK filtering).
- Validated results with high precision/recall metrics, effectively distinguishing positive vs. negative sentiment

Smart Healthcare Diagnostic & Records Management System

- DBMS Project - Healthcare records system with **ICD-10 coding**, audit logging, **RBAC security**, and AI readiness.
- 7-table relational schema (3NF normalized). Link https://github.com/khadeejah-01/smart-healthcare-db

Other Projects

Link

CERTIFICATIONS AND TRAININGS

IoT and Cloud Computing Bootcamp

Firnas Tech

- Secured 1st Position for "IoT-based Smart Farming System" at ABHCG Bootcamp. I used firebase cloud to enable real-time monitoring.

AWS Educate Getting Started with Compute

Amazon Web Services (AWS) *08/2025*

AWS Educate Getting Started with Storage

Amazon Web Services (AWS) *07/2025*

Data Science (3 months Online Training)

PFTP *12/2024*

SKILLS & AREAS OF INTEREST

Programming: Java, Python, C++, SQL, MATLAB, Javascript, HTML/CSS

Data Science & Machine Learning: Numpy, Pandas, Matplotlib, EDA, Data Preprocessing, Data Collection, Data Visualization, Scikit-learn, Logistic & Linear Regression, kNN, Naive Bayes, Model Evaluation, Ensemble Learning, Unsupervised Learning

NLP & AI: TF-IDF Vectorization, LLM/Transformer Fundamentals, Prompt Engineering, Deep Learning, PyTorch, RAG, Vector DB

Tools: Anaconda, Android Studio, PyCharm, NetBeans, AWS, Firebase, Jupyter, Networks, Wireshark, Linux, Git/Github
